Doug,
Can you move the anticipated problems and way forward to the front of the daily report, or at a bare minimum just after the exec summary.

Attached please find the Daily Progress Report for the Refugio Incident for June 2, 2015 as required by the Order for Removal, Mitigation or Prevention of a Substantial Threat of Oil Discharge. The format of this report has been modified slightly at the request of Captain Williams; the Summary of Anticipated Problems and Resolutions section has been moved forward in the report (page 9 in today's report). Please let me know if you have any issues with the revisions or have additional questions or comments.

Thanks
